

# DEFENCE-GRADE LANGUAGE SOLUTIONS

Empowering defence operations with expertly tailored and secure language solutions for commercial and technical content in 250+ languages.

# TECHNOLOGY-ENABLED SOLUTIONS

2M provides advanced language solutions for the defence sector by combining human subject matter experts with secure and responsible AI. Our approach blends expert linguistic knowledge with cutting-edge AI to create tailored solutions for critical communication needs. We employ AI-driven workflows to boost efficiency in international operations, humanitarian missions, and intelligence tasks, while upholding the highest standards of data protection and intellectual property security.

## Language AI

Source: English (en-UK)  
We are here to help you.

AI Translator

Target: French (fr-FR)  
Nous sommes là pour  
vous aider.

### AI Translation

Communicate in real time with people in other languages. Safe AI Translation works to quickly translate text into another languages for full clarity and understanding during times of urgency, while ensuring content confidentiality.

Use to support:

- Field operations
- Humanitarian aid
- Logistics and coordination

### AI Interpreting

AI Interpreting enables multilingual communication for meetings and conferences. Our solution uses defence-grade security measures to maintain full confidentiality during any onsite, hybrid or virtual event.

### AI Dubbing

Our AI Dubbing service effortlessly and safely transforms videos into other languages, employing lip syncing and voice cloning technology to turn speakers into fluent, native-like communicators.

Use for:

- Corporate addresses
- Training content
